Annex IV: Covered construction services

Part A List of construction services covered by Mexico

This Chapter applies to all construction services set out below that are procured by the entities listed in Annex I.

Construction Work Codes

Note: Based on the United Nations Central Product Classification (CPC) Division 51.

Definition of Construction work: Pre-erection work; new construction and repair, alteration, restoration and maintenance work on residential buildings, non-residential buildings or civil engineering works. This work can be carried out either by general contractors who do the complete construction work for the owner of the project, or on own account; or by subcontracting parts of the construction work to contractors specializing, e.g., in installation work, where the value of work done by subcontractors becomes part of the main contractor’s work. The products classified here are services which are essential in the production process of the different types of constructions, the final output of construction activities.

**Part B List of construction services covered by Israel**

This Chapter applies to all construction services set out below that are procured by the entities listed in Annex I.

Definition:

A construction services contract is a contract that has as its objective the realization by whatever means of civil or building works, in the sense of Division 51 of the Central Product Classification.

List of construction services:

CPC Description

511 Pre-erection work at construction sites
512 Construction work for buildings
513 Construction work for civil engineering
514 Assembly and erection of prefabricated construction
515 Special trade construction work
516 Installation work
517 Building completion and finishing work
518 Renting services related to equipment for construction
